

Arnav Pundir

☎ +91 70606 75133 | ✉ arnavp128@gmail.com | GitHub | 🌐 Microsoft Learn | 📍 Roorkee, India

Professional Summary

Computer Vision and AI-focused Computer Science undergraduate with hands-on experience in **Face Recognition, Object Detection, Gesture Tracking, and Vision Automation**. Completed Microsoft Learn training in **Azure AI Vision**, applying concepts locally using **YOLOv8, OpenCV, and InsightFace** to build deployable real-world systems.

Technical Skills

Languages: Python, JavaScript, C++, SQL

Libraries/Frameworks: OpenCV, TensorFlow/Keras, MediaPipe, Flask, React.js

Domains: Computer Vision, Deep Learning, OCR, Face Recognition, Video Analytics

Tools: Git, GitHub, VS Code, Jupyter Notebook

Education

COER University 2024 – 2028

B.Tech in Computer Science and Engineering

Atal Utkrisht Gov. Inter College, Roorkee 2022 – 2024

Senior Secondary (Class XII) – PCM (CBSE)

Projects

Face Attendance System (Web) | GitHub

- Automated attendance marking from uploaded group photos using face recognition.
- Optimized face matching pipeline achieving **90%+ recognition accuracy**.
- Reduced manual attendance effort by **80%** with searchable report generation.
- Inspired by **Azure AI Vision concepts**, deployed locally using OpenCV + Flask.

Traffic Analysis System (YOLOv8 Vehicle Detection) | GitHub

- Built real-time vehicle detection and counting pipeline using YOLOv8 + OpenCV.
- Processed video streams at **20–25 FPS** for smooth traffic monitoring.
- Generated CSV-based traffic flow analytics for smart city applications.
- Applied concepts learned through **Microsoft Azure AI Vision training**.

Air-Kalam Gesture Drawing Tool | GitHub

- Developed touch-free drawing system using MediaPipe hand landmark tracking.
- Achieved responsive gesture tracking with **real-time latency under 50ms**.

ASL Translator (Sign Detection) | GitHub

- Trained CNN model to translate ASL gestures into readable text for accessibility.
- Improved classification performance with data augmentation and optimized training.

Certifications & Training

Microsoft Learn (Feb 2026): Azure AI Vision & Custom Vision – Earned trophies in Computer Vision, Object Detection, OCR, Face Recognition.

Introduction to Generative AI – Fundamentals of GenAI applications.

Prompt Engineering with GitHub Copilot – AI-assisted development workflows.

Achievements

Built **5+ Computer Vision projects** demonstrating automation and AI-driven impact.

Active learner in AI/Deep Learning through Microsoft Learn structured paths.
