☎ +91 70606 75133 | ✉ arnavp128@gmail.com | 🌐 github.com/ArnavPundir22 | 📍 Roorkee, India

Career Objective

Aspiring Full-Stack Web Developer and active open-source contributor (**GSSoC**, **NSoC**) with hands-on experience in building responsive, scalable, and real-time web applications using **React.js**, **Next.js**, **Flask**, **TypeScript**, and **Databases**. Developed high-performance peer-to-peer video streaming platforms (**BaatCheet**) and robust event registration services (**Occassions**). Seeking opportunities in **Web Development or Software Engineering** to apply strong full-stack skills.

SKILLS

Languages : JavaScript, TypeScript, Python, SQL, HTML/CSS
Frontend : React.js, Next.js, Tailwind CSS, Responsive Web Design
Backend : Flask, WebRTC, Redis, REST APIs
Databases : MongoDB, PostgreSQL, MySQL
Tools : Git, GitHub, VS Code

EDUCATION

COER University <i>Bachelor of Technology in Computer Science and Engineering</i>	2024 – 2028 India
Atal Utkrisht Gov. Inter College, Roorkee <i>Senior Secondary (Class XII) – PCM</i>	2022 – 2024 India
Montfort Sen. Sec. School, Roorkee <i>Secondary School (Class X)</i>	2022 India

PROJECTS

Occassions Event Registration & Management Platform | [Live Website](#) | [GitHub](#)

- Built a modern full-stack event platform using **Next.js 15**, **TypeScript**, and **MongoDB**.
- Integrated secure organizer and attendee sessions using role-based **NextAuth.js** configurations.
- Implemented dynamic event capacities, registration cutoff timers, search/filter fields, and CSV data exports.

BaatCheet Real-Time Text & Video Chat App | [Live Website](#) | [GitHub](#)

- Developed a scalable real-time chat application using **Flask**, **WebRTC**, and **Redis** for peer-to-peer video streaming and instant messaging.
- Designed a secure "ephemeral" architecture to completely self-destruct chat logs and rooms once all participants disconnect.
- Designed responsive video layout feeds using canvas and CSS flexbox grids to optimize mobile screen spaces.

SevaSetu Service Website (Client Project) | [Live Website](#)

- Developed and delivered a responsive service-based website for a real customer using **React.js**.
- Designed modern UI components with smooth navigation and user-friendly layout.
- Deployed the project live at sevasetu.app, ensuring mobile compatibility.

Face Attendance System (Web Version) | [GitHub](#)

- Developed a full-stack attendance web application using **Flask** backend with face recognition integration.
- Implemented group photo upload system with automated attendance report generation.
- Managed structured student data logging for scalable classroom usage.

OPEN SOURCE & CERTIFICATIONS

GirlScript Summer of Code (GSSoC '26) – Active Open Source Contributor (Open Source Track)

Nexus Spring of Code (NSoC '26) – Selected Open Source Contributor (Community-driven repositories)

Introduction to Generative AI – Google Certified

Prompt Engineering with GitHub Copilot – AI-Assisted Development

HOBBIES & INTERESTS

Building full-stack projects, exploring UI/UX design, learning modern web technologies.

Problem solving through Competitive Programming and development challenges.

DECLARATION

I hereby declare that the above information is true to the best of my knowledge.
