Career Objective

Aspiring Full-Stack Developer and Open-Source Contributor with hands-on expertise building responsive, high-performance web applications. Proficient in **React.js, Next.js, Node.js, TypeScript, and 3D WebGL environments**. Experienced in engineering scalable real-time platforms and delivering production-ready freelance client projects. Seeking a Software Engineering or Web Development internship to leverage robust full-stack and advanced frontend skills.

SKILLS

Languages : C++, JavaScript, TypeScript, Python, SQL, HTML/CSS
Frontend : React.js, Next.js, Tailwind CSS, Three.js, GSAP, Framer Motion
Backend : Node.js, Express, Flask, WebRTC, Redis, REST APIs
Databases : MongoDB, PostgreSQL, MySQL
Tools : Git, GitHub, VS Code

EDUCATION

COER University <i>Bachelor of Technology in Computer Science and Engineering</i>	2024 – 2028 India
Atal Utkrisht Gov. Inter College, Roorkee <i>Senior Secondary (Class XII) – PCM</i>	2022 – 2024 India

EXPERIENCE

Freelance Frontend Developer <i>Client & Independent Projects</i>	Jan 2024 – Present Roorkee, India
---	--------------------------------------

- Developed and deployed a responsive service-booking platform (**SevaSetu**) using **React.js**, translating client requirements into a modern, production-ready user interface.
- Engineered two ultra-premium cinematic hotel websites (**Hotel Pacific, Hotel Sachin**) utilizing **Three.js, GSAP, and Framer Motion** for immersive 3D WebGL rendering and physics-based scroll animations.
- Optimized frontend assets and implemented component lazy-loading, achieving **95+ Lighthouse performance and accessibility scores** across all deployments.

PROJECTS

Occasions Event Registration Platform | [Live](#) | [GitHub](#)

- Engineered a full-stack event platform using **Next.js 15** and **TypeScript**, supporting concurrent user traffic and dynamic event capacities for **500+ attendees**.
- Secured platform routes by implementing role-based organizer/attendee authentication flows via **NextAuth.js** and **MongoDB**.
- Built robust search/filter algorithms with debouncing to reduce query latency by **40%**, and developed automated CSV data export pipelines for organizers.

BaatCheet Real-Time Video Chat App | [Live](#) | [GitHub](#)

- Architected a scalable real-time messaging and peer-to-peer video streaming application using **Node.js, Express, WebRTC, and Redis**, ensuring **sub-100ms** low-latency communication.
- Designed an "ephemeral" data lifecycle that automatically purges and self-destructs all chat logs and rooms the moment participants disconnect.
- Programmed a dynamic, responsive UI with CSS flexbox and integrated a **TURN server fallback mechanism** to guarantee WebRTC connection stability across strict NAT networks.

OPEN SOURCE CONTRIBUTIONS

Core Contributor <i>Nexus Spring of Code (NSoC '26) & GSSoC</i>	Apr 2026 – Present Ranked #63
---	---

- Achieved **Top 65 rank globally** by merging **13 Pull Requests** across 5 repositories, specializing in production-grade backend security and frontend performance.
- Migrated legacy authentication to secure, rotating **HttpOnly cookie sessions** and encrypted sensitive user data at rest utilizing **Fernet cryptography**.
- Enhanced backend security by tightening **CORS policies**, and improved frontend UX by implementing **server-side pagination, debounced searches, and loading skeletons**.
