SUMMARY

Results-driven Computer Science Engineering Student with a strong foundation in AI-based systems and software development. Proficient in Python, PyQt5, OpenCV, and machine learning frameworks. Demonstrated success through hands-on projects like a Face Recognition Attendance System and Emotion-Based Music Player. Seeking a dynamic role to apply technical skills and contribute to innovative real-world solutions

PROJECTS

AI - BASED FACE RECOGNITION ATTENDANCE SYSTEM

- Python, OpenCV, dlib, PyQt5
- Implemented facial recognition with blink detection for secure attendance logging.
- Developed a PyQt5 GUI and handled CSV-based data management.

VIRTUAL MOUSE USING HAND GESTURES

- Python, OpenCV, Mediapipe, PyAutoGUI
- Created a touchless interface for controlling the mouse using real-time hand gestures.

ANTI-SPOOFING SYSTEM

- Python, MediaPipe, Ultralytics, Yolo8
- Designed a security system to detect spoofing attempts using liveness detection techniques.

DESKTOP VOICE ASSISTANT - DEVIN

- Python, PyQt5, SpeechRecognition
- Built a voice-activated assistant capable of executing system commands and controlling media.
- Integrated modern GUI elements with waveform animations and real-time logging.

EMOTION MUSIC SYSTEM

- Python, PyQt5, OpenCV, DeepFace, QMediaPlayer
- The Emotion-Based Music App uses DeepFace and OpenCV to detect the user's emotion from a live webcam feed.
- Based on the detected emotion, PyQt5's QMediaPlayer plays a matching song from predefined folders.

DOCBOT – Document Summarization & QnA App

- Python, PyQt5, Google Gemini API, PDFMiner
 - DocBot is an intelligent desktop application that extracts and summarizes content from documentation links using the Gemini API.
 - It features a PyQt5 GUI with real-time question-answering based on the extracted content
-

EDUCATION

BACHELORS 'S OF TECHNOLOGY IN COMPUTER SCIENCE AND ENGINEERING (expacted - 2028)

College Of Engineering Roorkee

INTERMEDIATE (2024)

Atal Utkrisht Gov. Inter College Roorkee

HIGH SCHOOL (2022)

Montfort Sen. Sec. School Roorkee

WORK EXPERIENCE

• FRESHER

Currently on the lookout for opportunities to leverage my technical expertise and make a meaningful contribution to real-world software development projects.

ADDITIONAL INFORMATION

• Technical Skills:

1. Programming Languages: Java, C++, Python, JavaScript
2. Web Technologies: HTML, CSS
3. Tools & IDEs: IntelliJ IDEA, Visual Studio Code, Pycharm, Git & GitHub
4. Operating Systems: Windows, Linux
5. Libraries & Frameworks: OpenCV, PyQt5, dlib, MediaPipe, PyAutoGUI
6. Concepts: Object-Oriented Programming, DSA (C++), AI-based Automation.

• Personal Skills:

- 1.Strong analytical and problem-solving mindset.
- 2.Quick learner with adaptability to new technologies.
- 3.Effective communicator and team player

• Languages:

- 4.English (Fluent),
 - 2.Hindi (Native),
 - 3.Punjabi (Verbal)
-

EXTRACURRICULAR ACTIVITIES

- Leader, D-Coders Squad – Competitive Programming Club at COER
